

Clax Alegro

Alkali / builder booster

1AL1

Description

Clax Alegro is a liquid alkali builder/booster containing alkaline ingredients and NTA (water hardness binder), for use in soft water (up to 125 ppm).

Key properties

Clax Alegro is an effective alkali builder/booster, which is based on a balanced blend of alkalies, water hardness sequestering agents and anti-greying agents. The NTA based building system ensures low waterhardness ion concentration and consequently prevents precipitation of detergent components and greying of fabric.

It is most commonly applied in conjunction with a surfactant booster. These products, combined with bleach, offer a powerful system, which may be used for cleaning linen from hospitals and other healthcare establishments. It may also be used to wash hotel and restaurant linen.

When combined with a mainwash detergent, **Clax Alegro** enhances soil removal from heavily soiled washgoods by affecting the soil-fibre interaction as well as by saponification of fatty soil.

Clax Alegro has been approved by Unilever's Safety and Environmental Assurance Centre (SEAC) as safe for use when handled in accordance with the directions for use.

Benefits

Combined with a surfactant booster or a mainwash detergent:

- Improves soil removal; especially food (protein) and fat stains (e.g. restaurant- and kitchen linen)
- Counters greying of linen; stabilises soil particles in the wash liquor
- Improves wash performance by affecting soil-fibre interaction (swelling)
- Prevents yellowing of linen

Use instructions

Dosing level is dependent on wash classification.

Dosage recommendation:

Soil level	Dosage (ml/kg dry goods)
Light	2 - 4
Medium	3 - 5
Heavy	4 - 8

Clax Alegro

Technical data

Appearance	Clear colourless liquid
Total alkalinity [% Na ₂ O;pH 3.6]	20.1
pH [1% solution]	>12.5
Relative density [20°C]	1.30

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Store in original closed containers or (where applicable) in an approved bulk tank, away from extremes of temperatures.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

MAF Approval

MAF QUAL Dairy Approved

MAF Approved C33 (Fish Game Meat)
