

Strip Eze Stripper

Strip Eze is a deep penetrating non ammoniated floor stripper, that requires no rinsing or neutralising to properly prepare your resilient floor for sealing with a JohnsonDiversey floor sealer or sealer finish. Strip Eze is specifically designed for removal of floor finishes and floor sealers and should not be used on wooden floors or painted surfaces. Do not use on linoleum or rubber tile floors.

Features and Benefits

- Strip Eze is a deep penetrating, non ammoniated floor stripper.
- Strip Eze does not require rinsing.
- Its low foam formulation means it's easy to pick up.
- It will remove both metalised and non-metalised floor finishes.

Product Usage

Directions for Use:

1. Dilute Strip Eze between 1:2 and 1:6 with hot water depending on build-up. For removal of JohnsonDiversey Technique floor sealer, please use JohnsonDiversey Freedom stripper.
2. Apply solution liberally to floor using mop. Allow solution to soak 5-10 minutes. Ensure slurry is kept wet by reapplying solution as necessary. Allow solution to soak for longer if Strip Eze was mixed with cold water or for exceptionally heavy build-ups of floor sealer or finish.
3. Scrub the floor using a scrubbing machine and a black scrubbing pad.
4. Thoroughly pick up solution with clean mop or a wet and dry vacuum cleaner. Ensure solution is completely removed. Damp mop to remove any residue left behind.
5. Allow floor to dry completely before sealing with the appropriate JohnsonDiversey sealer/finish. Consult your JohnsonDiversey sales person or authorised distributor if unsure as to the appropriate choice.

USE IN WELL VENTILATED AREA
